MAG Regional Videoconferencing System Request for Proposals (RFP)

Questions Received from January 3, 2000 to January 7, 2000

Q: Is the end-user of the videoconferencing equipment a Federal Government customer or a State Government customer or even a commercial customer?

A: The end users are the 24 cities and towns, 2 Indian communities, Maricopa County and MAG. Please refer to the RFP.

Q: Is there a requirement to use existing equipment in any of the rooms? We noticed a large number of microphones, projection screen, projector mount and ceiling speakers in the Saguaro room at the pre-bid conference.

A: Bidders should be responsive to the RFP. The RFP does not require the bidders to use existing equipment in any of the rooms. Bidders should bid the specified equipment for end-sites and any equipment they believe is necessary for a successful Regional Videoconferencing System. Bidders should completely fill out Appendix C. The specifications detail the minimum equipment needs for each site.

Q: Can we get a copy of the existing equipment line drawing schematics for the Saguaro room?

A: A list of equipment in the Saguaro Room and a rough line drawing will be available on the MAG web site (http://www.mag.maricopa.gov) by Friday, January 14, 2000 at 5:00 PM.

Q: Can you provide an alternate point of contact for the Disadvantaged Business Enterprise (DBE) list? We have not been contacted after leaving messages.

A: Arizona Department of Transportation (ADOT) and the City of Phoenix certify and maintain lists of DBEs. The ADOT list can be obtained by mail or fax by calling 602-255-7761 or in person at 1739 West Jackson Street, Room 127P, Phoenix, Arizona, 85007. The City of Phoenix list can be obtained via mail by calling 602-262-6790 or in person at 251 West Washington Street, 7th Floor, Phoenix, Arizona, 85003.

Q: Was the Proposer's Conference mandatory?

A: No.

Q: May I have a list of proposers, if it is available?

A: A list is not available because we do not yet know who will submit proposals.
